The « **2019 Updates in Wound Technology** » meeting will gather wound healing specialists from all over the world, under the auspices of the French Wound Healing Society (SFFPC).

This annual meeting will be held in Paris **from Sunday 20 to Tuesday 22 January 2019** and will represent a unique opportunity to exchange up-to-date information concerning recently developed and brand new medical devices and concepts in wound management.

Europe being the place where most of the innovations are tested before being expanded to the rest of the world, Paris annual meeting will surely get the benefit of this increasing interest since more than a decade.

Outstanding communications given by **prestigious speakers** will show new clinical results and recently published **new technologies applied to wound healing**.

Themes selected this year by the Scientific Committee will focus on 5 main topics :

- > New biomaterials in skin reconstruction
- > Patient pathway
- > Wound infection
- > Pyoderma gangrenosum
- > Flaps vs step by step coverage

The International Symposium to be held on Sunday 20 January will cover **News in wound healing all over the world** and **What's new session will focus on more European specificities**.

Discussions born from these exchanges are since years a source of up-to-date information applicable on patients to enhance the quality of wound management in each stage of healing.

We invite you to **submit your abstracts online before September 17th, 2018** and look forward to welcoming you in Paris in January 2019.
